## Is Algebraic Graph Knowledge Possible?

Research has been conducted in order to evaluate the possibility of reaching meaningful knowledge from Algebraic Graph transformations.

Model Cheking and theorem prooving are viable paths.

#### When the neet to make strong assertions becomes inevitable:

- This is the first way: outstanding assertion!
- Even greater impact comes from: hilight text!

<sup>\*</sup>Note: This is a very long footnote line intended to test the layout of two.

"There is an increasing demand of current information systems to incorporate the use of a higher degree of formalism in the development process. Formal Methods consist of a set of tools and techniques based on mathematical model and formal logic that are used to specify and verify requirements and designs for hardware and software systems."
